## Professional Summary

Motivated and detail-oriented Java Full Stack Developer with expertise in Spring Boot, Hibernate, and SQL. Strong in backend architecture, clean UI design, and solving complex problems. Solved 150+ DSA problems on LeetCode and GeeksforGeeks. Solid understanding of OOPs, MVC, REST APIs, and Low-Level Design.

## Technical Skills

**Languages :** Java, SQL, JavaScript, C

**Frameworks/Libraries :** Springboot, Hibernate, Bootstrap, react.js,

**Databases/Tools :** MySQL, Postman, VS Code, Eclipse, IntelliJ Idea

**Concepts :** REST API, OOPs, DSA, Collections, JDBC, JPA, JWT Auth, Hibernate

## Work Experience

**Web Developer Intern | CipherByte (Remote)    may2024 - june 2024**

- Worked on developing Weather App using React.js and API
- Collaborated with frontend team to integrate APIs into React UI.

## Projects

### 1. Full Stack E-Commerce Application “ShopEase” | Spring Boot, MySQL, JWT, React.js, Hibernate

- Developed a complete e-commerce platform using Spring Boot (Java) for backend and React for frontend..
- Designed and managed the product catalog with features like searching, filtering, and pagination.
- Built a shopping cart and integrated Stripe for secure online payments and order processing.
- Used Tailwind CSS for a modern, responsive UI design.
- Stored and managed data with PostgreSQL using Spring Data JPA for efficient database operations.
- Integrated Stripe payment gateway for secure online payments, including features for order processing and transaction management.
- GitHub: <https://github.com/ashuuu08/shopEase-e-Commerce>

### 2. Event Planner Application “HINDU’S” | React, Node.js, Express, MongoDB

- Developed a web app allowing users to create, RSVP, and manage events using React for the frontend and Node.js/Express for the backend.
- Stored data in MongoDB and used Mongoose for database interaction.
- Implemented JWT authentication for secure user login and event creation.
- Created a real-time messaging system between event organizers and participants.
